

REAL WOOD **SMART PANELING**

Made in the **U.S.A.** Smart Paneling is an innovative, real wood product that enhances any space with its stylish finishes and superior quality. Using thermal modification (a proprietary, **GREEN TECHNIQUE**) this paneling is both beautiful and versatile. Installation is made easy with DIY adhesive tabs and nails in each box.

For home or commercial application

5 stylish finishes to create unique experiences:

HOLEY WOOD gives you a rough hewn effect on each panel which works for both modern or traditional design.

GRAIN WOOD accents the magic and beauty of the wood's pattern, creating the unique look of the grain.

BARN WOOD is a handmade product which offers the authentic look of old barn wood without all the disadvantages!

COUNTRY WOOD is a handmade product which accents the look of old painted barn wood.

MIXED WOOD offers a combination of different wood colors: gray, brown, black, white and gold which create a truly unique look!

ABOUT SMART PANELING

Smart Paneling is made of real wood and manufactured in the USA. Our wood is thermally-modified which eliminates all moisture, resins, sugars, organisms and bacteria resulting in a product that doesn't warp, shrink or cup on the wall or ceiling. Our thermo-treatment process is 100% green and ages the wood in a way identical to 350 year-old lumber. This gives you the aged look of naturally weathered wood without the rot, warping and imperfections. Thermo-treated wood is great for use in high moisture and humidity areas such as bathrooms, kitchens and basements.

DIY: Smart Paneling comes with self-adhesive strips and brad nails that allow you to install this yourself!

Panel Size: $\frac{1}{4}$ " x 5" x 23 $\frac{3}{4}$ "

Panels per box: 12 (covering 10 sq feet)
